

How to Download the NUU Buds B Apps: A Step-by-Step Guide

NUU

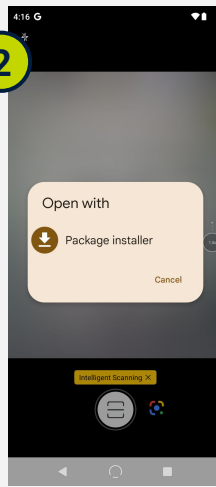

1

Step 1: Scan the QR Code

Start by scanning the QR code below. This will direct you to the link where you can download the NUU Buds B app's APK file.

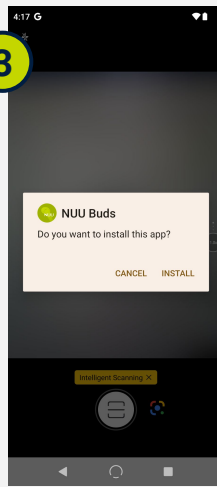

2

Step 2: Download the App

Open the link with your device's Package Installer and press the download button, typically shown as an arrow.

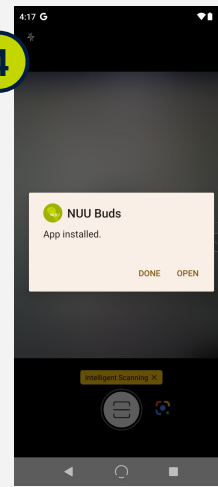

3

Step 3: Install the App

When prompted with "Do you want to install this app?", select "Install." Wait during the installation.

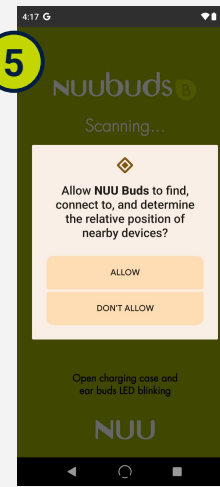

4

Step 4: Launch the App

After installation, you'll see an "App installed" notification. Tap "Open" to start using the app.

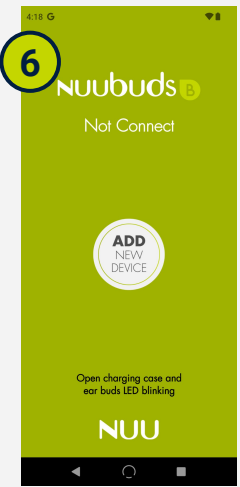

5

Step 5: Enable Permissions

Grant the necessary permissions for the NUU Buds B app to operate properly.

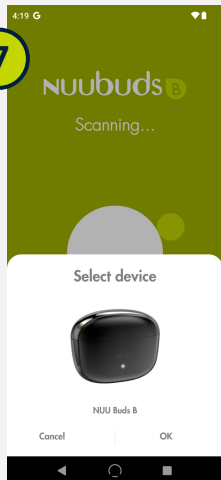

6

Step 6: Add and Connect New Device

Go to the app settings and choose to add a new device so you can connect your Buds B.

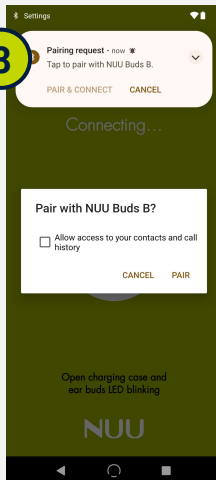

7

Step 7: Activate the Connection

Open the battery box of your Buds B to get them ready for connection.

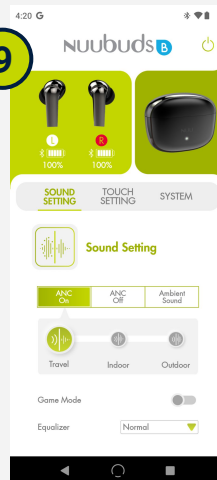

8

Step 8: Confirm Pairing request

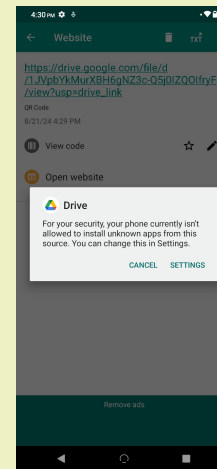

Respond to the pairing request to complete the setup by tapping "Pair" and "Pair & Connect".

9

Step 9: Complete Setup

Start using your NUU Buds B.

First time installing the application

If this is the first time you're installing an application in this way, Android may prompt a warning and request you to change permissions within **Settings**. Proceed to Settings to enable permission by tapping the "Allow from this source" toggle so that it switches to the right. You may then have to navigate **Back** to return to the installer. Then tap on **Install**, and the application will be installed successfully.

Tap this button and allow from this source.

If you're facing any difficulties to install Buds B Apps, please feel free to reach out to NUU customer support team by reaching our live-chat at numobile.com or email to support@numobile.com.
